

Do Your Applications Support Your Business?

CUSTOM-DEVELOPED APPLICATIONS DELIVER EXACTLY WHAT YOU NEED

BUSINESS CHALLENGE

Your business is unique. Off-the-shelf IT solutions and pre-packaged software might not suit your business and technology goals. Although you have the option of modifying your business to work around the software, it isn't always possible or desirable to do so. IT solutions should conform to your business, not the other way around.

Customising pre-packaged solutions or developing applications from scratch may better provide the functionality your business requires, but development work is fraught with its own challenges. Often, it necessitates venturing into new technologies, and you may be limited by the bandwidth of in-house staff. To further complicate the process, you may need to integrate your new systems with other key internal and customer-facing applications and/or migrate critical legacy data.

Employing the seasoned flexibility and deep experience of an outside consultant/developer can ensure you successfully develop and integrate the exact IT solution you need without wasting time and financial resources.

Whether in Java, SOA, PL/SQL, APEX, JDeveloper, or Oracle Fusion Middleware; Rolta-TUSC developers and project managers have the skills and experience to meet your technology and business goals.

SOLUTION OVERVIEW

Rolta-TUSC's Oracle and Open Systems Development addresses many types of application development needs. From business workflow tools to application integration, we offer a variety of unique solutions and expert capabilities.

Our seasoned consultants have deep technical, business, project management, and architecture skills developed through implementation of dozens of real-world applications.

BENEFITS

Whether you're implementing new technology and want help to ensure a solid architecture and design, or need Rolta-TUSC to manage a substantial development effort, some of the benefits you receive include:

- **Reliable results**—Utilising a proven project management methodology, Rolta-TUSC ensures successful application development and proper migrations to target systems. Our projects are completed on time and on budget.
- **Flexibility**—Use supplemental experts to fill in-house gaps and leverage best practices adapted to your technology environment.
- **Business value**—Our solutions improve business processes and productivity, while maximising your IT investment.

RELY ON ROLTA

TESTIMONIALS

"TUSC knew exactly how to implement this type of SOA solution, and their architects' expertise has provided us the ability to leapfrog the competition. Without TUSC's savvy business experience, we could have easily spent millions on hardware and software and the benefits of additional sources of revenue would have been completely lost. Web Services are absolutely essential to our business, and we likely wouldn't be profitable today without them."

—CEO and Founder

"TUSC's strength is identifying the business elements of a need and translating that [knowledge] into a viable IT solution."

—CEO

"When Oracle customers turn to TUSC, they gain a business partner that is recognised throughout the world for its expertise in the technology."

—SVP of Development for Oracle
middleware platform products

"This was an important step in the evolution of our company. We needed someone who would not only get the job done, but a true partner who would understand our business. TUSC was the perfect match. Their track record with custom business solutions is impeccable and unparalleled in the Oracle consulting industry. There's no doubt they are 'The Oracle Experts.'"

—EVP Technology and Finance

ORACLE PARTNER

SOLUTION DETAILS

New Custom Development

Rolta-TUSC will develop applications tailored to your unique business or technology needs. We have expertise in Java, SOA, PL/SQL, APEX, JDeveloper, Oracle Fusion Middleware and more.

Application Integration

Whether intra-departmental or inter-company, Rolta-TUSC can provide an integration solution that leverages best practices around a variety of technologies – including a patent-pending SOA enablement tool that dramatically reduces development time.

Systems Migrations

Working together, Rolta-TUSC and your IT staff ensure a successful migration. Your staff brings expertise in your legacy systems' database, code, and business rules, while Rolta-TUSC has intimate knowledge of the target platform.

Centre of Excellence

Through this service, Rolta-TUSC helps establish processes that guide an IT organisation around pitfalls, while mentoring in-house staff to ensure long-term productivity gains and self-reliance.

Application Lifecycle Services

Rolta-TUSC can provide skilled, experienced staffing for every stage of your development effort.
